PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science student with hands-on full-stack development experience across React, Django REST Framework, and MongoDB, gained through internship and independent projects. Actively seeking software development internship and full-time opportunities to apply technical skills in real-world projects.

EDUCATION

- B.Tech in Computer Science and Engineering, VIT Vellore — CGPA: 9.24 (2024 – Present)
- JEE Main 2024 — 96.66 Percentile (Qualified)
- Senior Secondary (XII) CBSE, SFS Public School, Kottayam — 97.4% (2024)
- Secondary (X) ICSE, Pallikoodam, Kottayam — 93% (2022)

EXPERIENCE

Full-Stack Development Intern, Antlegs Technology Solutions Pvt. Ltd. | June – July 2026

- Built two full-stack web applications — an Authentication & Profile Management App and a User Management Application — using React.js, Django REST Framework, and MongoDB.
- Implemented manual JWT authentication on protected API endpoints, working around MongoDB's ObjectId incompatibility with Django's default integer-based ORM.
- Added Redux Toolkit, bcrypt password hashing, httpOnly cookies, and an Axios token-refresh interceptor to the User Management Application, along with full CRUD functionality.
- Identified and fixed a broken access control vulnerability, improving the application's security posture.

TECHNICAL SKILLS

- Programming Languages: C, C++, Python, Java, JavaScript, Assembly, MATLAB
- Web Technologies: HTML5, CSS3, JavaScript, Node.js, React.js, Redux Toolkit, Django REST Framework
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, GitHub, Discord API, Gemini API
- Other: Basic 3D Modeling (Blender), Video Editing

PROJECTS

Authentication & Profile Management App | React.js, Django REST Framework, MongoDB, JWT

- Developed a full-stack authentication system with secure user registration, login, and profile management.
- Implemented manual JWT validation on protected endpoints to work around MongoDB's ObjectId incompatibility with Django's ORM.
- Built a responsive React frontend for viewing and editing user profiles.

User Management Application | React.js, Redux Toolkit, Django REST Framework, MongoDB

- Built a full CRUD user management system with Redux Toolkit for centralized state management.
- Strengthened security with bcrypt password hashing, httpOnly cookies, and an Axios interceptor for automatic access-token refresh.
- Identified and fixed a broken access control vulnerability, improving overall application security.

AI-Powered Discord Chatbot | Python, Discord.py, Gemini API

- Designed and developed a multifunctional Discord chatbot integrated with the Gemini API for intelligent query handling.
- Implemented features such as reminders, timers, automated responses, and server moderation tools.
- Added music playback and utility commands to enhance server engagement and usability.

Emotion-Based Song Recommendation System | Python, Machine Learning, Computer Vision

- Developed a real-time emotion detection system using webcam input and facial landmark mapping.
- Trained a machine learning model to classify user emotions based on facial features.
- Automated emotion-aware music recommendations using dynamic YouTube search queries.

JavaScript-Based Games | JavaScript, Node.js

- Created multiple browser-based games to strengthen understanding of JavaScript logic and event handling.
- Focused on improving problem-solving skills, DOM manipulation, and user interaction design.

CERTIFICATIONS

- Junior Developer Certification — WhiteHat Jr
- App Developer Certification — WhiteHat Jr
- [HTML, CSS, JavaScript, React - Online Certification Course — Udemy](#)

ACHIEVEMENTS & ACTIVITIES

- 3rd Place — Where's The Flag (CTF), IEEE Computer Society (35+ teams)
- Qualified to District Level in SOF IEO and ISO Olympiads; multiple-time school-level winner
- Participated in Summer Science Workshops at Cochin University of Science and Technology (CUSAT)

INTERESTS

- Game Development
- Artificial Intelligence and Automation
- 3D Modeling and Visualization
